1. INTRODUCTION

1.1 Introduction

Implementation of the Upper Gully Strategic Plan (Strategic Plan) will require collaboration and support from a number of stakeholders. While Council will lead and manage the implementation process, input and management may be required from other stakeholders including State Government agencies, the private sector, landholders, local business and the local community. These stakeholders may provide funding, own relevant sites or manage related infrastructure.

The Implementation Plan outlines the steps required to implement each strategy and action in the Strategic Plan including identifying responsibilities, stakeholders and priorities. This will ensure that the aspirations of the shared vision are realised through 'on-ground' projects.

The Strategic Plan will be implemented through a range of mechanisms, including:

- Statutory Implementation
 - Amending the Knox Planning Scheme (completed)
- Non Statutory Implementation
 - Council's Capital Works Program – Budgeted public realm and infrastructure projects
 - Council Programs and Services from City Development; Community Services; and Engineering and Infrastructure.
 - Partnerships / Advocacy – with State Government agencies, the private sector and the community.

The Implementation Plan will evolve over time and Council will continue to work together with the Upper Gully community and key stakeholders including State Government agencies through a 'place based' delivery approach, providing the framework to develop and refine initiatives and programs and measure the progress of strategies and actions to achieve the Vision and Strategic Objectives for Upper Gully.

1.2 Priority Projects and Staging

The Strategic Plan contains a number of priority strategies that will be a focus for implementation. These actions will most effectively deliver the renewal of the Upper Ferntree Gully Activity Centre (Activity Centre) over the short, medium and long term.

A staged approach to implementation of these actions is required so that project funding and resources can be managed, and so that development can respond to changing market conditions. The staging for implementation of these actions is classified as follows:

- In-progress
- Short term: within 2 years
- Medium-term: 2 years to 5 years
- Long-term: 5 to 10 years
- On-going: throughout the life of the Strategic Plan

The allocation of timeframes has been guided by independent technical research and recommendations, community priorities, statutory requirements and the consideration of Council business planning and processes.

The Implementation Program (refer Section 1.5), provides details on the timing and responsibilities for actions identified in the Strategic Plan. This Program is to be read in conjunction with the Strategic Plan.

1.3 Management, Monitoring and Review

As part of the implementation process, Knox City Council will review, manage and measure the implementation of the Strategic Plan. It is proposed that the review of the Strategic Plan will occur every five years. This will review and analyse:

- The actions and projects that have been delivered or underway;
- The success of key actions and projects including partnerships;
- The consistency of projects against the shared vision for Upper Gully and the objectives of the City Plan;
- Development activity since the introduction of Planning Scheme Amendment C141 to the Knox Planning Scheme; and
- Any obstructions preventing the successful implementation of the program.

This process will allow Council to measure the success of the program and allocate future resources as necessary and allow for the implementation program to be adjusted ensuring the vision is being achieved. All actions require Council in its various roles to facilitate and deliver. Some actions require direct input and management by others who may be landholders or infrastructure providers. A significant role for Council will be as advocate and partner with key public landholders.

Advancement of actions in the Implementation Plan will require Council's continued and dedicated involvement and commitment through the business and resource planning processes. Over time, the details of the Strategic Plan will be 'fine tuned' to incorporate evolving drivers of change including property market and demographic changes. The ongoing management of the Implementation Plan will need to be facilitated by and integrated into the business planning for the City Futures of Knox City Council. Ultimately, a Place Program Manager dedicated to the ongoing management of the Implementation Program is essential for Council to achieve the Strategic Objectives of the Strategic Plan.

1.4 Council's Role

Council can play a variety of roles to implement the actions of the Strategic Plan. Council will adopt the most appropriate role needed to deliver the actions and in many cases may need to play multiple roles due to the complexity of the task in hand and variety of pertinent stakeholders that Council will need to involve. Relevant service areas will lead actions where they fall into their business planning.

Table 1 provides a description of each role.
