

Knox City Council

PUBLIC ROAD REGISTER

Introduction

This document, Register of Public Roads (the Register), is prepared in accordance with Section 19(1) of the Road Management Act 2004 (the Act). The Register forms an integral part of the Road Management Plan (the RMP) which aligns with Division 5 of the Act.

The Register offers complete information concerning roads situated within the municipality of Knox City Council, including:

- Public roads for which Knox City Council (the Council) serves as the Coordinating Road Authority.
- Arterial roads for which VicRoads acts as the Coordinating Road Authority.
- Road management arrangements with neighbouring municipal councils and any designated road projects.
- Road management clarification, encompassing public roads, non-public roads, and structures where the Council seeks to determine the road management responsibility.
- Melbourne Water Corporation structures (e.g., bridges or culverts over aqueducts) integrated into public roads, with separate road management responsibilities assigned to both the Council and Melbourne Water Corporation.
- Ancillary areas to public roads with Knox City Council as the Coordinating Road Authority.
- Discontinuance of roads.
- Pathways (footpaths, bicycle paths, and shared paths) classified under Pathway Hierarchy 1 and 2.
- Private roads where entities such as body corporates, universities, companies, etc., are responsible for ensuring user safety.

If a road does not appear on the Register, it is understood that Knox City Council is not accountable for that road, including its road-related infrastructure. The data in the Register is current as of 31 December 2020 and will be updated approximately every six months. A copy of the Register can be downloaded from the Knox City Council's official website at www.knox.vic.gov.au.

For any inquiries, including reporting errors and omissions, please get in touch with the Knox Service Desk:

Phone: (03) 9298 8000

Email: knoxcc@knox.vic.gov.au.

Public Roads

A list of public roads in respect of which City of Knox is the Coordinating Road Authority is outlined in **Appendix 1**.

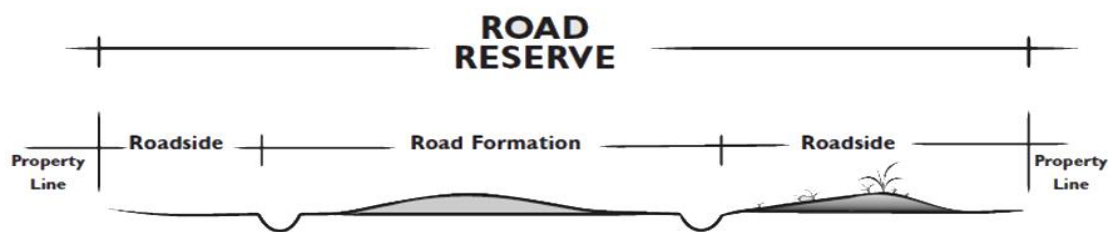

The list is from data extracted from the Lifecycle Asset Management Software, which is Council’s asset information system for road infrastructure. Roads are broken down into road segments to help the management of operation, construction, inspection, maintenance, repair, renewal, condition assessment and valuation of road infrastructure.

The data contained in **Appendix 1** should be read in conjunction with the following **Table 1 – Road Hierarchy**.

Coordinating Road Authority	Road Type	Road Hierarchy
VicRoads	Freeways	Refer to VicRoads Road Management Plan and Register of Public Roads
	Arterial roads	
Knox City Council	Public Roads	Access roads / Service lanes
		Industrial roads
		Collector roads
		Link roads

Table 1 : Road Hierarchy

In addition to the roadway of a public road, Knox City Council is also responsible for road infrastructure and road-related infrastructure part of road reserve. This would include traffic control devices, roundabout infrastructure, traffic islands, drainage, road & street signs, roadside vegetation, footpaths and, other assets found within the road reserve.

PUBLIC ROAD REGISTER DETAILS

The register is prepared in accordance with and meets the requirements set out in Section 19 and Schedule 1 of the Road Management Act, which identifies matters that must be included in the register.

Public Road Register Inclusions

- The name of the public road, or if a road is unnamed, a description which enables the particular road to be easily identified;
- The date on which a road becomes a public road if the road becomes a public road after 1 July 2004; The date on which a road ceases to be a public road;
- The classification, if any, of the public road;
- The reference of any plan or instrument made on or after 1 July 2004 that fixes or varies the boundaries of a public road and ancillary areas;
- A reference to any arrangement under which road management function in respect of any part of a public road or ancillary area is transferred from one authority to another.

The Knox City Council Road Register is available as a tabulated list for viewing at Council's customer service centres during regular business hours or via Council's website at knox.vic.gov.au

Whilst not a requirement of the Road Management Act, the Knox City Council Public Road Register also includes a Geographical Information System (GIS) reference key to link Public Road Register entries to Council's Asset Management System.

General Functions of a Road Authority

- To provide and maintain roads for use by the community served by the road authority.
- To manage use of a road effectively to meet its primary purpose of being a public road without having adverse effect on the safe and efficient operation of the road and on the environment.
- To manage traffic in a manner that enhances the safe and efficient operation of roads.
- To design, construct, inspect, repair and maintain roads and road infrastructure.
- To coordinate installation of infrastructure on roads and the conduct of other works in such a way as to minimise, as far as is reasonable, adverse impacts on the provision of utility and public transport services.
- To undertake works and activities which promote the functions referred to in the above paragraphs.

Notes: Extract from Road Management Act Section 34.1

Under the Act, road authorities can have responsibility both as a coordinating road authority and a responsible road authority. These functions are defined in Section 36 and 37 of the Act.

Coordinating Road Authority: The road authority with the responsibility for coordinating works within a particular road reserve.

Responsible Road Authority: The road authority with the responsibility for the operational functions within the road reserve.
