

Draft Playground Concept Plan

Peregrine Reserve, Rowville

A better playspace for your neighbourhood!

As part of Council's annual playground renewal project, the existing playground at Peregrine Reserve will be replaced with a new and exciting playspace that has a focus on natural play, ecofriendly materials and being accessible for all.

Council are also about to commence a Masterplan for Peregrine Reserve. We will seek broader community consultation for the whole of the reserve in November 2017.

Have Your Say

Council values the community's thoughts. If you would like to provide comments on this Draft Concept Plan please contact us via the range of methods noted on the page.

Council will take all comments received on board and adjust and improve the proposed play space design where possible and as budget allows. Council will aim to deliver the new play space at Peregrine Reserve in Mid 2018.

1. Nature Play 'Nest'

This play area incorporates the mosaic egg sculptures and existing vegetation into a new nature play 'birds nest'. The nest is shaped by logs, with rope nets and log sleepers to climb up.

2. Basket swing or Double swing

We would like to know would you prefer a basket swing (2a.) or a double swing with junior seat (2b.)?

2a. Basket swing

2b. Double swing with junior seat

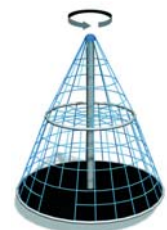

3. Would you prefer?

3a. Carousel spinner

THIS

OR

3b. Climber spinner

Why Natural Play?

Playing outdoors is beneficial for us all, as it helps us connect with nature and allows us to learn, explore and imagine.

Play is significant in the development of children's physical, social and creative skills.

Natural play spaces, such as the proposed redevelopment for your local reserve, provide people of all ages with the experience of both traditional play equipment and natural elements.

New play equipment

New trees

New garden beds

New rubber softfall surface

New mulch surface

4. Toddler Play Area

A new mounded toddler play area with a junior slide, stepped climbing rocks and tunnel running under the vegetated mound.

5. Double timber see-saw

This piece accommodates up to 4 children

6. Timber and steel play structure

Designed for juniors and seniors with the following items:

- Net structure between platforms
- Shop front
- Monkey bars
- Track glide (re-used from existing playground)
- Double senior slide
- Spider web
- Climbing wall
- Scaling wall
- Balance chain (re-used from existing playground)

Example only of equipment style
